

Modified Design Document

Original Design Document lacked the functionality for conservatory and aviaries. Modified design document has implemented the complete functionality to create conservatory, that houses max 20 Aviaries and each Aviary houses maximum of 5 birds. User can add bird to conservatory, lookup in the conservatory, lookup in the aviary, view the list of birds, view the aviaries in the conservatory as well as the food and quantity requirements with respect to the birds added in the conservatory. Below given UML shows some basic classes of the project. The project contains additional classes to provide information and aid the below shown basic classes. Birds is an Abstract class.
